

SUMMARY

- 10+ years of professional experience in mortgage, hospitality and building materials
- Collaborative individual contributor and capable of assuming leadership responsibilities
- Contributor to Open Source projects via Ruby for Good organization

SKILLS

- Javascript, MongoDB, Jest, Ruby, Rails, RSpec, SQL, NoSQL, Postgres, Node, HTML, CSS, APIs, JSON, Bootstrap, MVC, TDD, Agile Practices, Git, Github, GitLab, Heroku, Postman, CircleCI, Docker, GraphQL, Swagger documentation, YAML, Liquid, Jekyll, Sinatra, MERN stack

SELECTION OF EDUCATION AND RELEVANT CERTIFICATIONS

Turing School of Software and Design

08/2022 - 03/2023

- Contributed > 80% of code base to 5 significant Ruby on Rails projects; Fully-deployed; Monolith and SOA
- Collaborated to beat 2 week sprint deadlines with project test coverage > 95%
- Completed entire Software Development Lifecycle with documentation & retrospective for future iteration planning

DePaul University and Western Michigan University

- Bachelors of Science in Commerce - Finance (graduated DePaul)

SELECTION OF SOFTWARE PROJECTS (additional active projects at [Github](#))

DNVR-Zero

- **Tech Stack: MongoDB, Express.JS, React, MongoDB, Vercel cloud deployment, Jest testing**
- Full-stack application built with microservices
- Successfully created an ongoing, open-source project receiving active contributions
- Manage a team of 4 to produce an entire social media platform that modernizes a global service
- Successfully created production, development and test environments in NoSQL within 2 days
- Actively managing MVP, sprint planning, agile development and CRUD API creation with 95% test coverage

YouTube API Project

- **Tech Stack: Rails, SQL, Ruby, RSpec, JSON**
- Demonstrates ability to test and organize API consumption and exposure
- API-only app built using Service-Oriented Architecture and Test-Driven Development
- Achieved test coverage of greater than 95%
- Completed requirements > 48 hours ahead of deadline
- Effectively hand-rolled serializers to adhere to JSONapi specs

Board-Together Service-Oriented full stack application (Fully deployed on the web, via Surge cloud infrastructure)

- **Tech Stack: Rails, React, GraphQL, Bootstrap, Javascript, Express**
- Fully deployed distributed board game library live on the web
- Successfully implemented GraphQL endpoints and exposed external data to front-end within 24 hours
- Effectively organized and ran daily standups to focus MVP and identify successes and blockers for team of 8
- Implemented test factories using FactoryBot to accelerate RSpec test creation to achieve test coverage > 95%

SELECTION OF PROFESSIONAL EXPERIENCE (full history at [LinkedIn](#))

Supreme Lending

04/2021 - 08/2022

- **Sr. Mortgage Processor - remote**
- Reduced average length of loan approval and funding by 7 days across all mortgage types

Amerifirst Lending

09/2019 - 04/2021

- **Sr. Mortgage Processor - remote**
- Created workflow process and documentation used by teams to minimize redundant communication with external partners by sending 50% fewer emails

SELECTION OF INTERESTS/HOBBIES

- Ice hockey, photography, road cycling, carpentry, music production/creation, live performance, literature
